BRESCIANI

1970

In 1970, after long experiences in leading companies of the sector, Mario Bresciani decided to set up his own business and established the Mario Bresciani snc sock factory in Castiglione delle Stiviere (Mantova, Italy).

The corporate name was changed in 1980 into Calzificio M Bresciani srl, while keeping the same premises and brand names, and a new kind of distribution and collaboration began with major international firms. Started a collaboration with stylists supplying technical assistance and producing the collections, and looked for durable cooperation with leading firms of the sector.

These choices managed to create the conditions for an experience on the international level. After years of experience, the company is now established on the international market under its own brand name: Bresciani. The company distributes its production through sales organizations in Europe, Usa, Middle and Far East, Africa and South America and contributes to the fame of Made in Italy with high quality products.

Our company's attention to details begins with the selection of the finest and natural yarns in cotton, wool, cashmere, hemp, silk and linen. Rigorous quality control, highly skilled workmanship (all socks are hand linked) and computer technology ensure that our products meet the highest standards. This is the basis that has provided our long term cooperation with well known stylists while explaining our presence in leading menswear stores all over the world.
